***DO YOU HAVE AN AMATEUR  
RADIO LICENSE?***

**Join the Oceanside Cert  
Communications Team**

**After you become an Oceanside CERT member you will have the opportunity to join our group of HAMS.**

**We operate our own on-the-air Net practice On Sunday evenings and we conduct our own Field drills. We also join other nets for practice and drills and have made many cert ham friends in neighboring communities.**

**We meet monthly for meetings and trainings and have had the opportunity to help another city with traffic control using our radios at a city function.**

**We have members who are very happy to help incoming and new hams with radio setup and with on the air operations. We are also planning a group activity to make our own emergency antennas for our personal Go-Kits.**

**The arrl is the largest membership organization in the u.s. for and in support of HAMS, a wealth of info is available on the ARRL website ([www.arrl.org](http://www.arrl.org)).**

**Just as CERT is all about being prepared in case of an Emergency, our ham team has similar interests in the Amateur Radio Communications side. Radio Communication, in time of a disaster, may be the only way to communicate. It is Portable and is capable of operating 'off grid', such as using battery or solar power, etc.**
